

Course : Preparing Data for Analysis in Power BI

	Day
Chapter 1: Introduction to Power BI What is Power BI? How is Power BI different from Excel? Data Life Cycle Power Bi Environment Power Bi Licenses Download Power PI Desktop Chapter 2: Your first Project in Power BI Power BI Components Power BI Workflow Exercise 1 A: Getting Data Exercise 1B: Change Power BI Settings to on Object Interaction Exercise 1C: Creating Bar Chart Exercise 1 D: Create Pie Chart Exercise 1 E: Visuals interactivity Exercise 1F: Creating table and format results Exercise 1G: Publish and share your report. Knowledge Chek	1
Chapter 3: Connecting to Data Sources The ETL (Extract, Transform, Load) process ETL Components ETL Benefits Data sources that you can connect to in Power BI Combining Data Sources Connecting to flat data source Exercise 2: Preparing Settings of Project File Exercise 3: Connecting to Data Source Knowledge Check	2
Chapter 4: Transforming Data Why data needs to be transformed Introduction to Power Query and its interface Exercise 4: Exploring Power Query The Applied Steps list Exercise 5: Editing Rows Data types in Power BI Data types Groups Exercise 6: Changing Data Types Knowledge Chek Question 1	3
Chapter 5: Working With Columns Benefits of working with Columns Exercise 7: Connecting to CSV File Exercise 8: Connect to a Web Page Common data errors Activity: Dealing with errors in Power Query Exercise 9: Extracting Text	4
Exercise 10: Split Column Exercise 11: Creating A Conditional Column	5

Exercise 12: Creating a Column from Examples Knowledge Check Chapter 6: Advanced Data Transformation The Importance of data combination Ways to Combine Data What is a join? Join keys Exercise 13: Merging Queries	
Unpivot and pivot columns Exercise 14 Pivoting and Unpivoting Append Tables Exercise 15: Appending Queries Exercise 16: Organizing Queries in Groups Exercise 17: Entering Data Manually Knowledge check	6
Chapter 7: Data Profiling Introduction to Data Profiling and Statistical Analysis Profiling Data in Power BI Apply Data Profiling in Power BI Using the data profiling tools Exercise 18: Profiling a dataset Knowledge Check	7
Chapter 8: Practice and Final Project Practice 1: Merge GDP table with Population Data Practice 2: Adding Dimension Table Final Project Final Project Solution	8
